

To Whom This May Concern at the FCC (Michael Powell?):
This e-mail is in regards to NAB's petition 04-160 and my direct support to XM's ability to provide any programming without interference of the FCC or the National Association of Broadcasters.

Quite simply I pay for XM to receive the best radio possible and as service increases (i.e. traffic/weather reports) it continues to validate my rationale for subscribing to XM. By hindering this service you ARE hindering my right to choose.

Please do not stop XM from providing instant traffic and weather or for that matter any program they desire to provide... it's my right to choose.
